Company Details

- **1945:** AERO started producing individual products that were not lacking in any office, school bag or painting studio: adhesive glue (start of production in 1945), watercolor school paints (1946), matrix (1948), tempera inks and inks (1949), art oil (1950), adhesive tapes (1956), self-adhesive labels (1966), refreshing tissues (1969) and continuous paper in 1972, which also marked the beginning of today's Cetis.
- **1992:** Water and tempera colors have kept their popularity and usability to this day, so we can say that they have a 70-year tradition. Production of watercolor and tempera paint requires a lot of manual work, which is why Aero Ida took over the majority of production processes in 1992.
- **2017** The production of colors and promotional items is made by the Austrian investor Alexander Juan Hromatka, which owns already well-known brands (JOLLY, SAX, CRETACOLOR and ÖKI).
